

Site Development & Stormwater Permit 30 - 60 Days

Site Development & Stormwater Permits are required to be reviewed and approved for development in the City or the City's ETJ. Projects within the City's ETJ will only receive a review of the Stormwater portion of the application and any utility connections to the City's utilities. An additional application needs to be submitted separately to the Williamson County ESD No. 4 Fire Marshal's office at www.lhfdpermits.com for review and approval prior to final City approval.
