

Subdivision Construction Plans 30 - 60 Days

Subdivision Construction Plans are required to be reviewed and approved for all roads, water lines, and wastewater lines before the final plat is recorded. Fiscal surety, in the form of a performance bond, may be used in lieu of constructing the infrastructure prior to final plat recordation. A one ear maintenance bond is required prior to final infrastructure acceptance by the City. An additional application needs to be submitted separately to the Williamson County ESD No. 4 Fire Marshal's office at www.lhfdpermits.com for review and approval prior to final City approval.
